The MSc Program to lead the Innovation strategy and digital transformation of any company

The MSc In Digital Transformation & Innovation is a cutting-edge educational initiative created by Epitech, the IT and digital innovation leading school in Europe, well-known for its project-based learning approach.

With the MDTI program you'll master the essentials of innovation and understand all the technological building blocks to define and deploy a digital transformation strategy at any company.

This program combines global innovation and management subjects with the technical knowledge of different technologies (i.e Big Data, IoT, AI, Cloud, VR) applied to different business vertical sectors (i.e RetailTech, FinTech, HealthTech, GreenTech). After completing the program, professional opportunities include leading the digital transformation strategy at any kind of company, as well as to develop your own business project.

Final Digital Transformation Project

Trusted by companies

Since it was founded, Epitech has been forming tailor-made partnerships with companies on all its campuses. This approach allows companies to help the school place innovation at the heart of the different economic sectors, at the center of technologies and social issues. These "Player" companies are committed to taking part in the various initiatives organized by the school.
